

JORGE BARCO

Fresno, Tolima
Colombia, 1981

Lives and works
in Medellín

BIOGRAPHY

Jorge Barco develops his body of work around electronic mechanisms, sound art and experimental laboratories. He creates objects, installations and projects oriented by the notions of low tech and mestizo aesthetics, intermingling diverse elements into coherent sculptures. He has produced exhibitions, live performances and workshops in different museums and festivals dedicated to the circulation of electronic arts in Latin America and Europe. Currently he is one of the artists with the most impact in the field of sound in Colombia, mixing object-oriented construction, theoretical and curatorial production and the active promotion of the experimental scene.
